

Size Matters!

The 1930 Z0 torch from Peli may be small, but it's perfectly formed!

Lancashire Fire & Rescue Service has recently placed an order for more than 700 of the Peli 1930 Zone 0 LED torches, with the total amounting to approx. 1300 units.

The 1930 Zone 0 weighs just 30 grams and the service specifically chose this model because of its compact size, thus reducing bulk. The torches will be used as personal issue to be fitted on Fire fighters' helmets.

As part of their commitment to ensure the safety of the workforce, Lancashire Fire & Rescue Service preferred the 1930Z0 to provide light for close-up work including checking gauges on BA sets.

Offering greater battery efficiency from the LED, this Peli torch is an environmentally friendly option. The ATEX Zone 0 rating ensures that this torch can be used in all hazardous areas.

Other features include:

- Weighs just 30g
- Less than 7cm long
- Pocket clip for easy attachment
- No quibble warranty

Lancashire Fire Fighters with their Peli 1930 Zone 0 torches.

The 1930Z0 is one model in a comprehensive range of Peli professional torches which include hands-free lights, head torches, pocket lights and intrinsically safe models to cater for a wide range of user requirements. All are rugged, ultra-bright and manufactured to perform in the toughest conditions. With a long lamp life and extended battery burn time, you won't be left in the dark with the Peli 1930 L1 Z0.
