

AREA LIGHTING SYSTEMS

REMOTE AREA
LIGHTING SYSTEM

Peli Area Lighting Systems are the ultimate maintenance-free portable lighting solution.

With a strong focus on the design of a product which is both economical and environmentally sustainable, Peli's award winning range has been internationally recognised; chosen by some of the world's most renowned organisations as their preferred method of emergency or remote location lighting. Reliability is assured through the use of the highest specification components, including the latest LED technology.

Instant, silent illumination is on hand whenever it is required, with a wide choice of rechargeable models. Manual handling is significantly reduced, and each complete system can be set up by unskilled labour within seconds. No need for fuel or cumbersome, expensive generators, which also means a reduction in costs to both your company and the environment.

NEW TO THE 9430B

12V auxiliary outlet allows the user to power laptops, mobile phones etc.
