

PELITM

MICROCASES

Photo by Ben Osborne

WATERTIGHT • CRUSHPROOF • DUSTPROOF • WEATHERPROOF

Peli MicroCases are designed for active lifestyles and are built to perform in extreme conditions. MicroCases are crushproof and feature an impact absorbing rubber liner/seal that prevents water, sand or dust ingress (certified to IP67).

MicroCases protect digital and compact cameras, mobile phones, PDA's, binoculars – in fact, anything that you want to keep safe and dry.

There are seven sizes and four colours with a choice of transparent or solid coloured lid.

Peli MicroCases in the harsh conditions of the Polar Ice Cap.

Features

Breathe In. Breathe out.

All Peli MicroCases have an automatic purge valve, allowing for quick equalisation after changes in altitude or temperature.

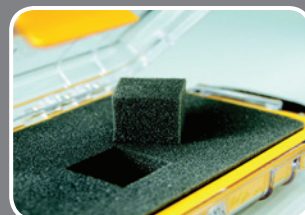

Watertight Seal

MicroCases feature an exclusive watertight seal. No water, sand or dust can penetrate this seal.

Hinge Mouldings

MicroCase hinges are moulded into the main unit and secured with stainless steel pins ensuring that the case has no weak points.

Foam inserts

Foam is available as an optional accessory for each size of microcase. It fits perfectly in the base for added protection.

Model	Length (mm)	Width (mm)	Depth (mm)	Solid Colours				Clear lid with coloured liner							
				Black	Blue	Red	Yellow	Black	Blue	Red	Yellow				
1010	108	68	41												
1015	131	67	35		X	X									
1020	131	86	41												
1030	161	64	49												
1040	161	95	40												
1050	161	95	67												
1060	209	106	54
